Building The Future Today

WHO WE ARE

In 1969 the Association of Architectural Technologists of Ontario (AATO) established its charter. For four decades, AATO members have diligently served the building sciences community.

On December 19, 1996 the AATO realized fundamental change. On that date, an Act respecting the Association of Architectural Technologists of Ontario was established by the Ontario Legislature.

This Act recognizes the AATO's responsibility for the following titles:

- Architectural Technologists
- Architectural Technician
- Registered Building Technologist
- Registered Building Technician

The Profession

Architectural Technology is an accredited Profession. The high level of architectural education achieved by Accredited Architectural Technologists qualify them for Responsible positions within the industry, executing the Safe design and management of construction projects.

"Our members in private practise design and prepare architectural drawings for building permit within their areas of expertise. These projects vary from residential to commercial and industrial building types. In addition to our members in private practise, the membership also has many individuals who work within the public and private sector."

"Accredited Architectural Technologists, as Specialists in the science of building, provide An alternative to engaging an Architect for Building projects in accordance with Ontario Building Code."

Members work in a variety of positions Including designers, project managers, municipal plans examiners, building inspectors, supervisors, specification writers and general contractors.
