

Toronto East Chapter

The presenter: John Godden

With over 25 years of experience as a home and heating system designer and hands-on builder, John is a leading rater and consultant for the R-2000, ENERGY STAR, EnerGuide and LEED for Homes programs. John co-designed ENERGY STAR workshops for builders and advisors in Ontario and regularly delivers seminars on air-tightness, better building practices, and green sales and marketing.

John is a R-2000 Quality Assurance professional, a member of the Building Canada team, member of HRAI and a member of the ENERGY STAR Technical Committee, and the lead technical consultant to the Green Builder Challenge. John is a board member of the Canadian Residential Energy Service Network (CRESNET) and the Sustainable Housing Foundation. He was a member of the national technical committee that developed the LEED Canada for Homes program. In partnership with the Town of Newmarket, John is the principal consultant for Rodeo Fine Homes who is building Canada's Greenest Community comprised of thirty-four LEED Platinum Homes with will be complete in 2011. Currently, John is working with Royal Pine Homes and the Town of Richmond Hill on a subdivision of 115 low energy homes with all solar thermal water heating.

SB-12 Workshop

9am to 5pm, February 11th, 2012

As of January 1st, 2012, the Ontario Building Code now requires more intensive energy efficient design for residential and small buildings. The AATO Toronto East Chapter is offering a workshop to clarify these requirements and provide solutions to attendees, with John Godden of Clearsphere as presenter.

IN THIS WORKSHOP YOU WILL LEARN:

Where the old code had one way to comply with energy efficiency requirements, the new Code has a large number of prescriptive compliance packages;

- The pros and cons of each strategy;
- The individual requirements within each strategy;
- Under the objective basis of the OBC, Acceptable Solutions as issued by the Ministry;
- Solutions for additions and renovations to comply with the new standard;
- The use of EnerGuide 80 and ENERGY STAR performance levels;
- Added information on LEED for House and HERS standards, and their potential use by production builders to differentiate their product;
- What it takes to be permit ready for residential and small building projects under the 2012 standard.

Come to this workshop to ensure that you and your clients are ready to deal with the new energy efficiency requirements!

This workshop to count as 2 seminar credits for Intern members and 7 CPD credits for Accredited members. Certificates to be issued upon completion of workshop.
